ESTB WEB PAGES

<http://www.esa.int/navigation/estb>

The screenshot shows the ESA website's navigation page for the EGNOS System Test Bed (ESTB). The header features the ESA logo and the text "EGNOS System Test Bed" and "European Space Agency Navigation". A navigation menu includes "ESA Home", "Satellite Applications", "Navigation", and "What is EGNOS?". The page is dated "8-Nov-2001 12:29 UT".

The EGNOS System Test Bed (ESTB) is the EGNOS prototype which has been broadcasting a Signal in Space (SIS) since February 2000. It is used to support and test the development of the EGNOS system, to demonstrate EGNOS to potential users, to prepare for the introduction of EGNOS and to test the possibility of expanding this system outside Europe. The ESTB provides users with a GPS-augmentation signal that enables them to calculate their position to an accuracy of within a few metres.

ESTB/EGNOS HELPDESK

The ESTB/EGNOS Helpdesk aim is to create an interface with the users giving answers on the following main issues:

- **ESTB/EGNOS General Questions**
- **ESTB/EGNOS Performance**
- **ESTB Specific Technical Issue**
- **ESTB Operational Issues**
- **ESTB/EGNOS User Equipment**
- **Info/Request/Support for ESTB Trials**

The helpdesk address is: **ESTB@esa.int**

HELPDESK FAQ

1. ESTB available Receivers
2. ESTB availability and Broadcast schedule
3. EGNOS / WAAS Interoperability
4. EGNOS Program schedule
5. EGNOS Performances

- Summary

ESTB NEWSLETTER

The ESA ESTB News is aimed at ESTB current users and all potential future EGNOS. It includes: results from EGNOS trials, regular updates on ESTB/EGNOS status, specific technical tutorials, FAQ, and useful EGNOS/ESTB links. (ESTB-NEWS@esa.int)

From Dec 2002 will be renamed to **EGNOS News**

- ❑ Summary

EGNOS Signal In Space over the interNeT in real time

Satellite Navigation

- Ubiquitous
- Standardised
- EGNOS enhances GPS performance to 1-2 m
- Very low rate needed

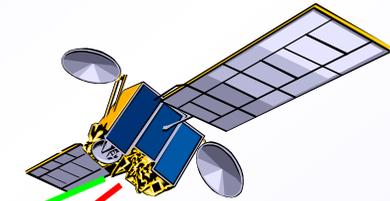

The Internet

- Ubiquitous
- Standardised
- Proven communications
- Future-proofed

Together, these technologies are stronger than the sum of the parts

Excellent complement to satellite transmission
In urban and canyon areas.

EGNOS GEO
satellite

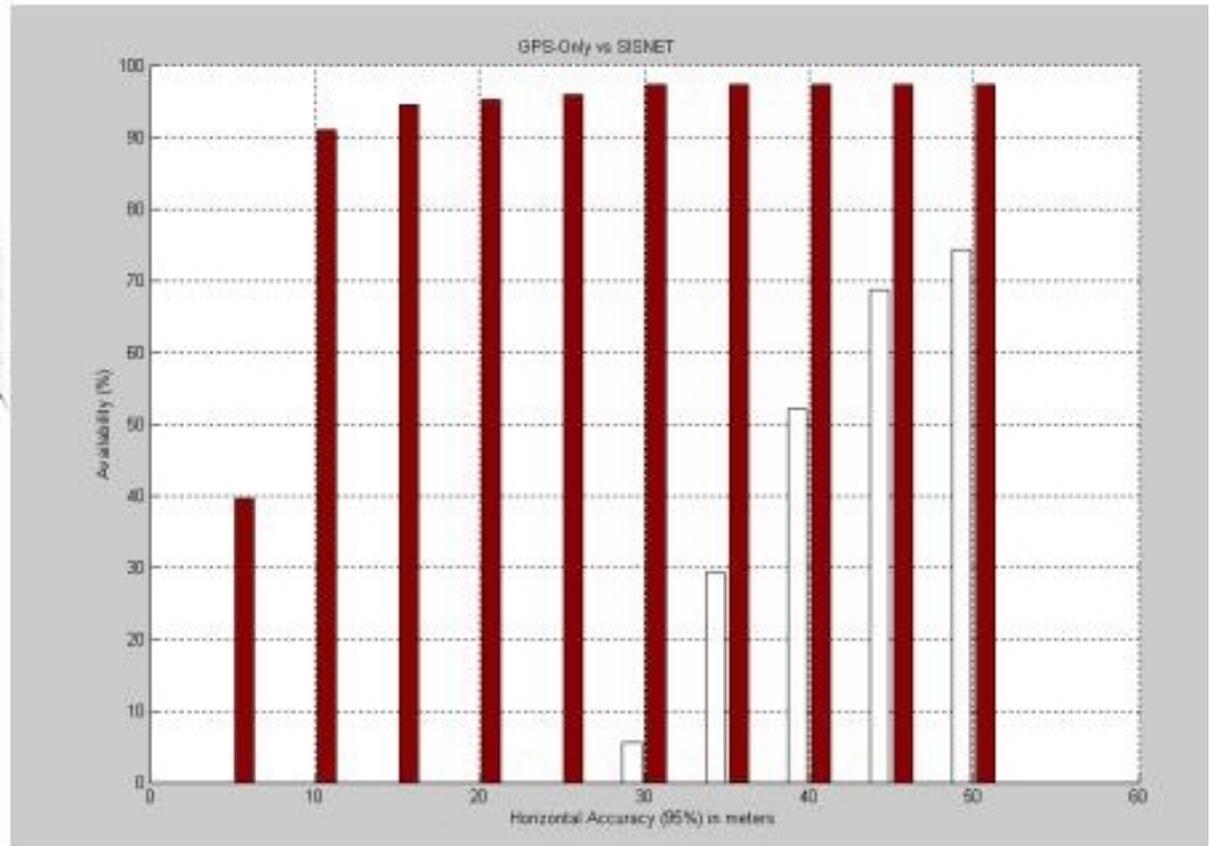

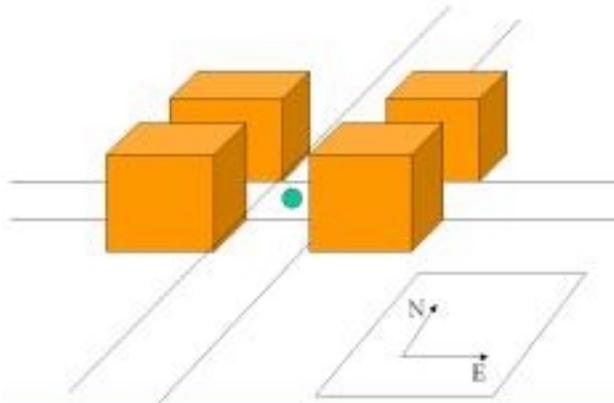

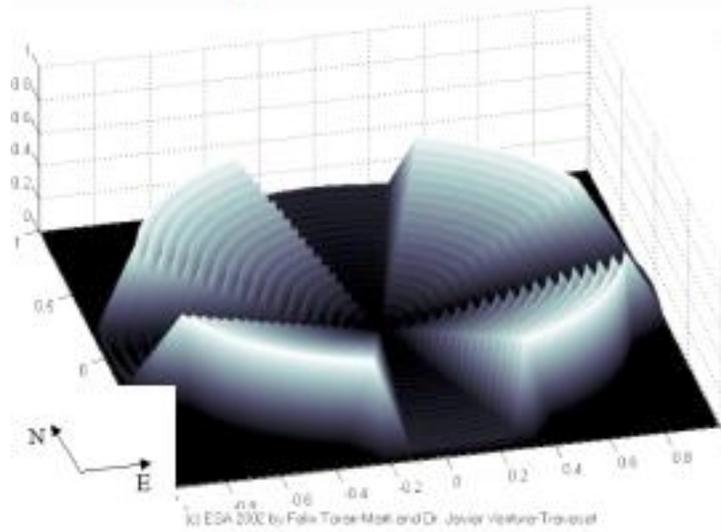

EGNOS blocked
by buildings

Getting EGNOS corrections in these cases proves to be very useful

Preliminary Simulation Result: Scenario_1

Example of on-going low cost Multi-modal EGNOS demonstrations supported by ESA

EGNOS Project office

- ❑ EGNOS/SISNET for public bus transportation (NAVOCAP)
- ❑ EGNOS dissemination through FM RDS (TDF)
- ❑ EUROCOPTER (Helicopter Emergency Medical Services)
- ❑ DELTA hybridation test in airports (M3 systems)
- ❑ EGNOS disseminations through DAB (BOSCH/BLAUPUNKT)
- ❑ SISNET iPAC PDA receiver (Finish Geodetic Institute)
- ❑ EGNOS/SISNET to support blind pedestrian (GMV)

ESTB/EGNOS Useful website addresses (summary)

- ESA website : www.esa.int
- EGNOS website : www.esa.int/navigation/egnos
- ESTB website : www.esa.int/navigation/estb
- SISNET website : www.esa.int/navigation/sisnet

ESTB/EGNOS Useful E-mail addresses (summary)

- Daily E-mail on planned ESTB operations : **Christophe.texier@cnes.fr**
- ESTB Helpdesk : **ESTB@esa.int**
- ESTB Newsletter : **ESTB-News@esa.int**
- SISNET administrator : **SISNET@esa.int**

SUMMARY

- ❑ ESA keeps updated a dedicated **ESTB website** in support to users including ESTB real time information, ESTB SIS planned broadcast schedule and ESTB-measured daily performance results.
- ❑ ESA supports a dedicated **ESTB/EGNOS Helpdesk**. We also provide information on ESTB upgrades and relevant tests through a dedicated **ESTB News Journal** (quarterly basis).
- ❑ ESA has set up the **SISNET technology** to allow ESTB SIS access through Internet in real time. We support experimentation with that technology.
- ❑ ESA EGNOS P.O. is supporting a large number of low-cost **EGNOS multi-modal trials**, which make use of the ESTB EGNOS-like signal.
